***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 2, drawn to a rotating and reversing mechanism for an LCD display, classified in class 349, subclass 58.
- II. Claim 3, drawn to a hanging frame, classified in class 40, subclass 448.

It is noted that the hanging frame is *not* an element or part of the rotating and reversing mechanism 3, as apparent from the drawings and the specification. Therefore, the preamble of claim 3 is not proper.

The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a portable DVD player for single user, i.e. the DVD player can be placed on the user's lap or the user's desk, instead of using with the hanging frame for plural viewers. Invention II can be used as a sign hanging or picture frame hanging. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and vice versa, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
